

PARAJET DISCONTINUED PARAMOTOR PARTS

SEPTEMBER 2020 - VOLUTION 1, VOLUTION 2 & CYCLONE

Parajet are hugely pleased to see the paramotor industry continue to thrive and evolve with new, exciting and innovative products being released each year as this very much echoes our core values for product innovation and improvement. Regrettably, as time passes and as a result of the continuous development and improvement within the industry and its key suppliers, it eventually becomes necessary to discontinue a historical product line and the various components to service them. As a result of this inevitable evolution we regret to inform owners of the historic models **DK Whisper**, **Parajet Volution** (Micro, Compact, Macro), **Parajet Volution 2** and **Parajet Cyclone** (160cc & 294cc) that we are no longer able to source, produce and supply spare or replacement parts.

SUGGESTED RESOURCES FOR PARAMOTOR SPARES

In true Parajet fashion and always with a strong desire to support our customers of all product eras, we have compiled a list of independent suppliers who may possibly stock a limited number of generic off the shelf replacement parts. We sincerely hope this may help and give you a head start in the process of searching for available parts and please find this list below:

VOLUTION 1 PARAMOTOR PARTS
